

Low Speed Vehicle and Golf Cart Policy

Golf carts were first introduced to the Georgia Tech campus in 1996 to accommodate the Summer Olympics, and their use, as well as that of street legal Low-Speed Vehicles (LSVs), has grown since then. This policy outlines Georgia Tech's expectations for the purchase, safe operation, and usage of street legal LSVs on the Georgia Tech campus. This regulation applies to Georgia Tech-owned LSVs, other motorized carts that are driven on Georgia Tech's campus.
